

Yuval Ron

Guitarist Yuval Ron performs original tunes that transcend the boundaries of any specific musical genre. Inspired by a crossover of modern jazz-rock icons and a host of many other contemporary artists from the progressive rock, fusion, metal and other modern music genres, it is all well blended into an own fresh and distinct musical direction.

The music features virtuosic performances of various compelling and colorful compositions, produced on top of a cinematic, orchestral, some say sci-fi film-like backgrounds, atmospheric soundscapes and various implanted sound effects drawing the listener into a total, electrifying experience.

The players place a constant emphasis on harmonic richness, rhythmical sophistication and an extensive use of synthesizers, laptops and other electronic instruments. The band brings together a few internationally rising talents of the jazz and progressive music scenes.

"Progressive guitarists such as Yuval Ron are clearly among the 'ruling elite' of modern musicians" – Metal Temple

Yuval started to play the guitar at a young age. It wasn't long before he became active as a player, songwriter, leader and sideman in local bands which played a variety of styles in Metal music and Hardcore.

After being exposed to a myriad of artists from the contemporary jazz, progressive rock and metal genres, he decided to take on the route of jazz improvisation and has since gained some unique approaches to jazz and guitar performance.

Yet for most, Yuval is a self-taught musician, exploring the endless boundaries of his instrument and music as a whole. Later on, he kept expressing much of his musical vision through his band Yuval Ron & Residents Of The Future, while working on other collaborations and solo projects.

“The album is a combination of carefully thought out compositions with improvisations, and I just found myself listening and smiling, gently moving with the beat as I feel under its spell.

– Prog Archives

Touring worldwide, Yuval has performed in some of the major jazz and music festivals and has recorded several albums and live videos with his band.

Alongside, he is a music instructor, professional composer, arranger and music producer.

“Yuval Ron & Residents of the Future give the fusion world something to be proud of. To have young men carrying the torch of the genre so highly, and with so much flavor and flair, one cannot help but be impressed.” – Jazzrockworld
